

BILATERAL  
KINETIC TELECOMMUNICATION COMPANY

BYLT™  
BYLT LLC - 9 RIVER STREET - MILFORD, CT

**#nft #ipfs #blockchain**

BYLT://

**BILATERAL:** One or more parties, assets, objects, axis, location, or energy.

**KINETIC:** Relating to or resulting from meta, motion, movement, mass or energy. From Greek *kinētikos*, from *kinein* 'to move'. Dynamic.

**TELECOMMUNICATION:** The science and technology of communication over a distance by cable, telegraph, telephone, satellite or broadcasting. Telecommunication is the transmission of information by various types of technologies over wire, radio, optical, or other electromagnetic and wavelength systems.

## **BYLT is evolution.**

**Bylt** is an interplanetary bilateral peer to peer network operating system. The system starts socially via independent anonymous accounts that are correlated to tax id numbers for digital security, business, compliance and income tax purposes.

**Accounts** can be from Professionals, Manufacturers, Tradesmen, Technicians, Brokers, Asset & Portfolio Managers including anyone and any assets. Assets can be robotics, vehicles, equipment, employees, products, land or materials.

**Companies**, government and individuals no longer have to worry about pre-screening, qualification building, on-boarding, sourcing, scheduling, job searching, job-posting, tracking, procurement, specifying, building & model access, procurement, life-cycle and payments.

## **BYLT is zero trust.**

**Bylt** Infrastructure and platform is one of a kind with no single point of failure, multi layer cold device protocol for public + private instant switch. In events of solar flare, EMP or natural disasters protocols are automated to reboot or pull data back via retraction.

**End to End Encryption** including: apps, data products, locations, communications and collaborations. Work in real time on documents, projects, design, supply chains & logistics or bids, freelance or contracts.

## **BYLT is geospatial, holistically.**

**Assets** are stored and transmitted through a geospatial network including a 6 axis control that interacts off **BYLT bilateral data feeds** that are reactionary to the otherwise stationary assets.

## **Bilateral Kinetic Circular Economic Operating System**

**Bylt** auto aggregates and creates digital twins of you, a product or asset. Putting data rights in the users hands. Bylt uses technology and systems available right now to tackle urgent problems plaguing on-boarding, geo-political risks and supply chains.

We give allowed stakeholders the ability to track, manage and create products securely and confidentially from design, build, sale, ship, sail, re-purpose or disposal. Streamlining compliance with sophisticated holistic compliance algorithms.

## **BYLT is always on. Always Connected**

**Bylt** is designed to work with available devices, equipment, finance and assets right now, but also, scale seamlessly with new assets as they cycle inventories via new manufacturer and supply chain specification and supplies. Bylt works offline and communicates without Internet service in the worst of conditions.

**BYLT is social.**

**Invest** in businesses, projects, products, causes, assets and or developments socially. Users can invest with asset, equity and benefit control right from your wallet. Employee or professional benefit management has never been easier or more engaging.

**Users** can have, display or even connect their existing podcasts, broadcasts, meetings, calls, texts, streaming channels and investment transparency.

**Interactive Data & Feeds** from air quality to port and vessel traffic with integrated geographic project tagging and alerts. Track news articles and geo-fencing holistically from your projects and tasks or create tasks or assignments right from a data feed received.

**Integrated automated** advertising and news which can also be broadcasted out to https news, social and media partners sites. For this and user benefits BYLT has integrated with APPLE news, BING News, Google News, Brave, Duckduckgo, Yahoo, Yahoo Finance, Yandex, RSS, SEO and more.

**ESG** is tracked along the way holistically within BYLT and auto aggregating based on delivery methods, product compositions, procurement, distances and overall end product. **Barcodes, GS1 or labels not required.**

## **Auto Aggregations**

**Data** aggregations, search, solicit and filtering in real time by relevant user or product experience via NAICS, D.O.T., Military, CSI & Other Enterprise Code Compatible.

## BYLT FUSE CONNECTED

**Everyone. Everything.** Connected & Protected. Quality control, product connectivity and interoperability, alerts, failures and preemptive maintenance and checks.

## Robotics, Autonomy & Controls

**Telematics** allow Bylt to offer both on site and offsite operations.

## BYLT ASSET TRACKING AND ANALYTICS

**Analytics** unheard of before bylt with real time tracking of any product or asset with non-fungible data. Bylt not only stores meta, data and broadcast to and from the product or asset it also stays inside the product, asset or material.

## Stock Built In Apps & Integrations - Real Time And Collaborative

Word Processor, Spreadsheet, Presentation, File Manager, Project Management & 3 D Modeling Interaction, Assets, Portfolio, Wallet, Projects, Services, Products, Followers, Following, Feed, News, Posts, Share, Jobs, Employees, Experience, Analytics, Controller, Two-Way Talk, Meetings, Call, Message, Certified Letter, Jobs, Invest, Inventory Management, News, Podcast, Stream, Building or Structure Hosting, Object Hosting, Passive Income.
